

Summary

Product Designer with 6+ years of experience creating user-centered digital products for SaaS, start-ups, and B2C platforms. Skilled at integrating data insights with creative design to deliver engaging solutions that drive retention and user satisfaction.

Recent Experience

Product designer | SmartSurvey

Aug 2023 - Present / (Remote) Tewkesbury, UK

Outline: At SmartSurvey.co.uk, I contributed to a leading SaaS platform in the data collection sector. My role involved enabling users to build, customise, and distribute surveys tailored to their organisational needs. I supported features that streamlined dashboard customisation, facilitated effective data visualisation, and enhanced data analysis and reporting tools, empowering clients to derive actionable insights from their data.

Key Responsibilities:

- Following a full-stack design process from initial idea through to fully shipped product
- Utilising tracking plans and analytics to help build understanding and inform decisions
- Working closely with product managers and engineers to prioritise and ship work.
- Cross team collaboration working with specialists and key stakeholders.
- Planning, facilitating, and synthesising user research via interviews and user testing

Key Achievements:

- AI Survey Automation: Increased **retention by 12% and reduced survey creation time by 38%.**
- Enhanced survey logic with “Carry Forward Answer Choices,” delivering **£36k in added value.**
- Implemented a design system, **reducing inconsistencies by 30%** and streamlining development
- Optimised onboarding, **decreasing setup time by 22% and improving new user retention by 11%.**

Product designer | CybSafe

Aug 2022 - Jul 2023 / (Remote) London, UK

Outline: At CybSafe, a SaaS cybersecurity start-up, I contributed to a platform aimed at training users in security best practices. I facilitated campaign setup, implemented platform customisation, and integrated gamification features to enhance engagement. Additionally, I developed workflows supporting off-platform touchpoints, ensuring a holistic cybersecurity education experience.

Key Responsibilities:

- Delivered full-stack design solutions, from ideation to product release.
- Designed wireframes, user journeys, and prototypes to streamline workflows.
- Led design efforts for two squads, facilitating planning and execution.
- Collaborated with product managers and engineers to launch and improve features.
- Created detailed design documentation for seamless handoffs.

Key Achievements:

- Redesigned phishing workflows, retaining customers worth **£64k ARR.**
- Integrated gamification features, **increasing engagement by 13% (£45k ARR).**
- Developed an email schedule flow, **boosting report downloads by 17%.**

Product Designer | Mobas

Feb 2021 - Sep 2022 / (Hybrid) Cambridge, UK

Outline: Worked in an agency/consultancy environment, designing a range of digital products, from SaaS platforms and CMS websites to brand assets and printed materials. Led projects from initial scoping and ideation through to final execution, ensuring cohesive and high-quality design solutions across digital and physical mediums.

Key Responsibilities:

- Applied a design thinking process from project scoping to final product delivery.
- Created wireframes, user flows, and rapid prototypes to refine digital experiences.
- Served as the sole designer, leading the design vision for all digital products.
- Developed detailed, clear design documentation to streamline execution.
- Conducted and synthesized user research to inform and validate design decisions.

Skills

Design

- Wireframing & Prototyping: Figma, ProtoPie, Principle
- User Journeys & Interaction Design
- Visual & Brand Design: Style Guides, Brand Consistency
- Design Systems: Creation & Maintenance
- Responsive & Adaptive Design
- Motion Design: After Effects, Lottie
- Accessibility: WCAG AA/AAA Compliance
- Information Architecture & Content Strategy
- AI-Driven Design: Automation, Generation + NLP

Collaboration

- Workshop Leadership & Design Critiques
- Cross-Functional Strategy: "3 Amigos" (PM, Engineering, Design)
- Stakeholder Management: Interviews, Reviews, Demos
- Documentation & Knowledge Sharing
- Providing Design Direction

Research

- User Research: Interviews, Surveys, A/B Testing
- Data Analysis: Mixpanel, Hotjar, Google Analytics
- Research Synthesis: Identifying Pain Points & Insights
- Testing & Optimisation: Hypothesis Creation, Scenario Planning

Strategy & Business Alignment

- Product Roadmapping & Prioritisation
- Design Metrics & KPIs
- Competitive Analysis & Market Research
- Agile Methodologies: Scrum, Kanban

Soft Skills

- Creative & Analytical Thinking
- User-Centric Problem Solving
- Adaptability & Resilience
- Clear Communication & Negotiation
- Leadership

Tools

Design

Figma, Adobe Creative Cloud, Procreate, Proto-pie

Research

Google forms, Useberry, Product Board, Mix-panel, Hot-jar, User-interviews and Type-form

Project management / Collaboration

Notion, Slack, Teams, Gong, Miro, Whimsical

Education

BA (Hons) Graphic and communication design

(2016 - 2019)

Grade: First Class honours

Experience

Key Achievements:

- Improved sign-up for a mental triage client, **increasing engagement by 21% (£23K impact)**.
- Customised a design system, **reducing CMS build time by 50% (£80K impact)**.
- Designed a bespoke learning platform for the RSC **(£30K impact)**.
- Developed a custom website for the Cancer Alliance **(£26K impact)**.

Product designer | Snowing Data

Apr 2020 - Mar 2021 / (Remote) Haverhill, UK

Outline: Worked at a tech start-up, assisting small businesses in setting up websites and developing platform concepts. Collaborated directly with clients and CEOs to create user flows, wireframes, and prototypes, while also contributing to brand creation and design collateral.

Key Responsibilities:

- Designing wireframes, user flows, and interactive prototypes to refine product concepts.
- Leading digital product design efforts from ideation to execution.
- Planning, facilitating, and synthesising user research to inform design decisions.
- Developing and maintaining design systems to streamline workflows and improve consistency.
- Working closely with stakeholders to align design with business and technical requirements.

Key Achievements:

- Produced UI and prototypes for camera use in interrogation rooms pitch - **(Value 19K)**
- Custom design web / mobile application for emergency services - **(Valued at 25K)**

Digital designer | Jacob Bailey

Oct 2018 - Apr 2020 (On-site) Ipswich, UK

Outline: Worked across multiple business areas to create a range of branding and digital assets for clients. Designed brochures, flyers, and brand identities, while also producing web assets, custom websites, and email designs to enhance digital engagement.

Key Responsibilities:

- Created marketing collateral, including brochures, flyers, and brand identities.
- Designed custom websites, email templates, and digital assets for client campaigns.
- Developed innovative design solutions tailored to client needs and brand guidelines.
- Designed web assets optimised for performance and user engagement.
- Worked across departments to ensure cohesive branding and messaging.
